DIRECTIONS

Read the text and then answer the questions.

Ever since he was six years old, Nick had wanted to get a puppy. His parents always refused. They said he wasn't capable of taking care of a puppy. "You have no idea how much work a puppy is," Dad said. "You would have to housebreak the puppy, train the puppy to obey you, and groom it, too."

"And then there's taking the puppy to the vet, playing with it, and feeding it," Mom added. "It's not that I'm against having a puppy. But a puppy takes up a lot of time."

Nick **couldn't** think of a way that he could convince his parents that he was ready for a puppy. Then, he got an idea. "If I volunteer at the animal shelter," he thought, "I'll bet Mom and Dad will see that I'm ready to take care of a puppy!"

1. Which word tells a reader most about the text while previewing it?

- (A) obey
- (B) groom
- (C) idea
- (D) puppy

2. What is the problem in the text?

- (A) Nick's parents think that he is not capable of taking care of a puppy.
- (B) Nick is allergic to puppies.
- (C) Nick's parents think that puppies are not a lot of work.
- (D) Nick's parents think that the family should get a puppy right away.

3. A person who *volunteers* is someone who

- (A) studies for tests.
- (B) does no work at all.
- (C) gets a raise.
- (D) does work without being paid.

4. Nick's parents say he isn't *capable* of taking care of a puppy. Which word or phrase means *capable*?

- (A) interested
- (B) angry about
- (C) afraid of
- (D) able to

5. What does the phrase *have no idea* mean?

- (A) do not understand
- (B) can't think
- (C) ran out of ideas
- (D) have an active imagination

Life Cycles

Each plant and animal has a life cycle. A life cycle is the series of stages that all living things experience as they grow up and make new life. Life cycles are different. The differences depend on how long the plant or animal lives and the way they make new life. Life cycles are how life on Earth continues. When the last specimen of a plant or animal completes its life cycle without leaving offspring, we say that species is extinct.

1. What is the definition of a life cycle?
 - a. the daily life of a plant or animal
 - b. the stages all living things pass through
 - c. something only animals experience
 - d. the stages of the life of a plant
2. If there are no more specimens of a plant or animal left, we say the species is _____.
 - a. hibernating
 - b. at the beginning of its life cycle
 - c. extinct
 - d. at the end of its life cycle
3. Why are the life cycles of plants and animals different?

Name: _____ Date: _____

Directions: Read the text, and answer the questions.

Economics

The early American Indians relied on natural resources to meet basic needs. Men made weapons to kill animals for food and clothing. They made tools to trap animals and fish. Canoes were made from wood for travel. Women made pots from clay, stone, or wood. They gathered food and wove baskets from reeds and strips of plants. The trading of seeds brought agriculture to most American Indian cultures. The “Three Sisters” (corn, beans, and squash) became common crops. Trade centers developed near travel routes on lakes and rivers. They traded extra resources as part of their local economies. Some tribes used beads made of shells or stone as a form of money to trade for items they needed.

1. What did men do to support their tribe’s economy?
 - a. They wove reeds into baskets.
 - b. They made clothes out of animal hides.
 - c. They gathered seeds.
 - d. They hunted animals.
2. How did the early American Indians use their environments to survive?
 - a. They were hunters and gatherers.
 - b. All tribes were farmers.
 - c. They used iron pots to cook their food.
 - d. American Indians ate only plants.
3. Which one of the following was NOT part of the economy of the early American Indians?
 - a. trading extra goods for things they needed
 - b. hunting and gathering food
 - c. doing jobs for payment
 - d. storing food for later use
4. How did trading help American Indians produce more food?
 - a. Tribes traded seeds.
 - b. Tribes traded gardening tools.
 - c. Tribes traded plants.
 - d. Tribes traded containers to save seeds.

Nick wanted a puppy, so he decided to become a volunteer at the animal shelter. He was hoping to convince his parents that he was ready to take care of a puppy. He volunteered at the shelter twice each week, on Tuesdays after school and on Saturdays.

While he was there, Nick did several things. He walked the dogs and washed and brushed them. Grooming the long-haired dogs took a long time! He cleaned up the dogs' kennels, too. He also played with the puppies to help get them used to people. Sometimes he gave them baths as well. Once in a while, Nick spent time with the kittens and cats, but he preferred working with the dogs. There was always plenty to do at the shelter, so Nick was never bored.

1. What does the first sentence tell about this text?

- (A) This text is about volunteering at an animal shelter.
- (B) This text is about taking shelter during a storm.
- (C) This text is about adopting an animal.
- (D) This text is about different animals.

2. What detail does the author include to explain why Nick plays with the puppies?

- (A) to help them learn to eat and drink
- (B) so he can stop being afraid of dogs
- (C) to help them get used to people
- (D) so he can learn about the different breeds of dog

3. To which word can the suffix *-ing* be added?

- (A) also
- (B) dogs
- (C) care
- (D) plenty

4. What is a *kennel*?

- (A) place for animals
- (B) kind of food
- (C) piece of clothing
- (D) helper

5. Which word means *once in a while*?

- (A) often
- (B) never
- (C) occasionally
- (D) daily

Read the text and then answer the questions.

Nick volunteered at the animal shelter for three months. He learned a great deal about raising puppies and training them. Every time he learned something new, he practiced it. He also told his parents about what he was learning. He wanted to persuade them that he could be trusted with a puppy of his own. One afternoon, Dad picked Nick up from volunteering and asked him how the day went.

"Oh, it went great," Nick answered **enthusiastically**. "They even let me help introduce the dogs to people who want to adopt them!"

"That's terrific!" Dad answered with a grin. "I'm so glad you're getting this experience. You'll need it for our new puppy!"

"We're getting a puppy?" Nick practically shouted. "That's awesome! I can't wait!"

Write and interpret numerical expressions.

1. Find the property that each equation shows.

Write the equation in the correct box.

$$15 \times (7 \times 9) = (15 \times 7) \times 9$$

$$23 + 4 + 109 = 4 + 23 + 109$$

$$13 + (3 + 7) = (13 + 3) + 7$$

$$87 \times 3 = 3 \times 87$$

$$1 \times 9 = 9$$

$$0 + 16 = 16$$

Identity Property of Addition	Commutative Property of Multiplication	Identity Property of Multiplication
Associative Property of Multiplication	Commutative Property of Addition	Associative Property of Addition

2. For numbers 2a–2b, select the correct value for the expression.

2a. $55 - (12 + 2)$, value:

39

41

43

2b. $25 + (14 - 4) \div 5$, value:

7

27

37

3. Carmine buys 8 plates for \$1 each. He also buys 4 bowls. Each bowl costs twice as much as each plate. The store is having a sale that gives Carmine \$3 off the bowls. Which numerical expression shows how much he spent?

A $8 + [(4 \times 16) - 3]$

C $8 + [(4 \times 2) - 3]$

B $8 + [4 \times (16 + 3)]$

D $8 + [(4 \times 2) + 3]$

GO ON

Name _____

4. Valerie earns \$24 per hour. Which expression can be used to show how much money she earns in 7 hours?

- ☐ A $(7 + 20) + (7 + 4)$
☐ B $(7 \times 20) + (7 \times 4)$
☐ C $(7 + 20) \times (7 + 4)$
☐ D $(7 \times 20) \times (7 \times 4)$

5. Evaluate the numerical expression.

$$2 + (65 + 7) \times 3 = \boxed{}$$

6. Jackie followed these steps to evaluate the expression $15 - (37 + 8) \div 3$.

$$37 + 8 = 45$$

$$45 - 15 = 30$$

$$30 \div 3 = 10$$

Mark looks at Jackie's work and says she made a mistake. He says she should have divided by 3 before she subtracted.

Part A

Which student is correct? Explain how you know.

Part B

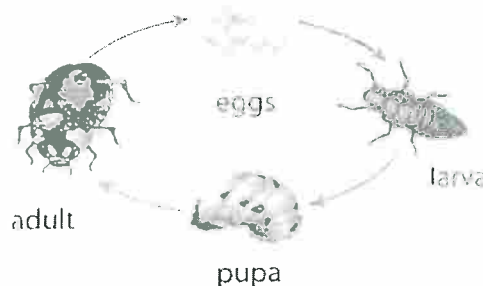

Evaluate the expression.

Name: _____ Date: _____

Directions: Look at the illustration, and read the text. Then, answer the questions.

Martine is very interested in studying insects. She researches the life cycles of insects and discovers that they all go through the same stages. The stages are: egg, larva, pupa, and adult. These changes are called metamorphosis. The time these changes take varies for each type of insect.

- If Martine finds a butterfly cocoon in her back yard, what will she need to know if she wants to see the butterfly emerge?
 - what the temperature was on the day the cocoon was formed
 - how long it takes a butterfly to complete its metamorphosis
 - what color the butterfly will be
 - what food the butterfly will eat when it emerges
- Martine finds some insect eggs on a leaf. If she comes back the next day and sees tiny bugs where the eggs were, what stage of the life cycle are the bugs most likely in?
 - pupa
 - adult
 - larva
 - molting
- What is a question that Martine could ask to learn more about the process of metamorphosis?

- Write about a time you saw a bug that was not fully grown.

A NEW FRIEND FOR NICK

Nick's parents had finally given him permission to get a puppy. Nick was so excited about it that he could hardly wait to bring his puppy home. The family had decided that they would adopt a shelter puppy, so one Saturday, Nick and his parents visited the shelter where Nick volunteered. When they arrived, Nick told the shelter manager why they were there.

"That's wonderful!" said the manager. "We have two litters of puppies that are waiting for good homes. One is a litter of dalmatians, and the other is a litter of corgis."

Nick and his parents looked at one another for a moment. Then, Nick said, "I'm pretty sure we don't have enough room in our home for a dalmatian. Could we look at the corgi puppies?"

"That sounds sensible," Mom said. "I like corgis, and I've heard that they're good family pets."

The manager escorted Nick and his parents to the room where the puppies lived. Within a moment, Nick had found the corgi puppy he wanted. "Look," he pointed. "That's the one I want!" Everyone looked at the puppy Nick had found. He was the smallest of the litter, but he looked healthy and friendly. The manager let Nick and his family cuddle the puppy and play with him for a few minutes. Then Nick said, "I'm absolutely sure about him, Mom and Dad."

Mom and Dad agreed that he was a good choice. Dad asked, "What's his name going to be?"

"How about Tucker? He looks like a Tucker, doesn't he?" Nick asked.

"Tucker it is," said the manager as she printed out the adoption papers. Mom and Dad signed the papers, and then the manager handed Nick and his parents a leash, a bag of food, and three dog toys. "Here are some important things you'll need," she said, handing Nick a list.

Nick looked at the list. They would need a kennel or crate, food and water dishes, and a lot more. "We'll have to go to the pet-supply store next," he told his parents.

NAME: _____ DATE: _____

DIRECTIONS

Read "A New Friend for Nick" and then answer the questions.

1. Which prediction is based on the title and illustration?

- (A) Nick is moving to a new town.
- (B) Nick makes a friend at camp.
- (C) Nick will get a new puppy who will become his friend.
- (D) Two puppies do not get along.

2. Why does Nick choose a corgi?

- (A) Dalmatians are too big for the house.
- (B) He is afraid of dalmatians.
- (C) His parents do not like dalmatians.
- (D) He likes corgis better than dalmatians.

3. What is the purpose of this text?

- (A) to entertain
- (B) to persuade someone to get a puppy
- (C) to learn about training a puppy
- (D) to find out how much a puppy costs

4. Why would Nick suggest going to the pet-supply store next?

- (A) The family does not know where the pet-supply store is.
- (B) The family did not find a puppy.
- (C) The family will need to buy things for Tucker.
- (D) The shelter manager works at the pet-supply store.

5. How does the shelter manager probably feel about Nick adopting Tucker?

- (A) worried
- (B) jealous
- (C) furious
- (D) glad

6. What do you think Nick will do when he gets home?

- (A) He will play with Tucker.
- (B) He will do his homework.
- (C) He will watch TV.
- (D) He will go on a bike ride.

7. What can readers learn from Nick and his family?

- (A) Pets should be as large as possible.
- (B) Puppies only need food and water.
- (C) There are many things to consider when choosing a puppy.
- (D) Parents should pick the family pet.

8. Which text would have a similar theme?

- (A) a nonfiction review of a video game
- (B) a poem about cats
- (C) a fictional story about a child choosing a new bike at a toy store
- (D) an advertisement for pet food

3. Jasmine kept a record of how many miles she ran each week during one month.

Week	Distance (in miles)
Week 1	4.754
Week 2	4.752
Week 3	5.19
Week 4	5.75

Order the weeks from the fewest number of miles Jasmine ran to the greatest number of miles Jasmine ran.

Least			Greatest

4. The four highest scores at a diving meet were 9.08, 9.1, 9.15, and 9.06 points. Choose the numbers that make the statement true.

The lowest of these four scores was

9.08
9.1
9.15
9.06

points.

The highest of these four scores was

9.08
9.1
9.15
9.06

points.

5. In which number is the value of the digit 5 greater? Write the number in the box.

3.514	25

Read the text and then answer the questions.

The U.S. government has three branches. One branch is the *executive branch*. That branch is in charge of running the government. The president of the United States is the head of the executive branch. Another branch is the *legislative branch*. That branch is in charge of taxing. It also makes laws, prints money, and does other important jobs. Congress heads the legislative branch. The third branch of government is the *judicial branch*. That branch is in charge of making sure that laws are fair. It also interprets the most important set of laws, the Constitution. The judicial branch is also in charge of making sure that anyone accused of a crime gets a fair trial. The Supreme Court is the head of the judicial branch.

4. (Y) (N)

5. (Y) (N)

1. Which word best summarizes what the text is about?

- (A) running
(B) accused
(C) government
(D) trial

4. What is the meaning of the word *head* in this text?

- (A) the leader
(B) the mind
(C) the start of something
(D) a part of the body

2. Which branch of government is in charge of making sure laws are fair?

- (A) the president of the United States
(B) the executive branch
(C) the legislative branch
(D) the judicial branch

5. What does it mean to be *in charge* of something?

- (A) to push
(B) to be responsible for
(C) to work together
(D) to write

3. Why is *Constitution* capitalized?

- (A) It is the last word in a sentence.
(B) It is the first word in a sentence.
(C) *Constitution* is a proper noun.
(D) The president is the head of the executive branch.

Human Traits

Everyone is unique. The things that make us unique are called traits. Traits are characteristics. We may share traits with other people, but we all have a unique combination. Some traits are inherited, or passed from parent to child. Eye color, hair color, and even the ability to roll your tongue are all inherited.

We acquire some characteristics through learning or the effects of the environment. This could be your ability to ride a bike or play an instrument. You are not born with these things like you are with inherited traits.

1. Which is an example of an inherited trait?
 - a. ability to ride a bike
 - b. ability to play an instrument
 - c. manners
 - d. eye color
2. Where do inherited traits come from?
 - a. parents
 - b. children
 - c. pets
 - d. the environment
3. How can you acquire a new characteristic?
 - a. learn a new skill
 - b. be born with blue eyes
 - c. eat a new food
 - d. be born with dark skin
4. Is it possible for you to have the exact same traits as one of your parents? Why or why not?

Name: _____ Date: _____

Directions: Read the text, and answer the questions.

People lived in North America long before the Europeans came. Each area had its own climate and landscape. This determined the natural resources that they used to build their homes. The American Indians of the Northwest Coast and the Northeast Woodlands made their longhouses out of wood and bark. These buildings were best in cold weather. Many families would live in one longhouse. The American Indians of the Southeast made their open-air houses with wood and grasses.

The Plateau, Great Basin, and Plains Indians were nomadic. They moved around a lot in search of food. Their tepees were made from tree branches and animal hides. The Southwest Indians made their adobe homes from bricks of clay and straw.

The landscape is varied in the area of the California Indians. Different kinds of homes were built depending on where they lived. Some groups built cedar bark lodges, while others built grass huts. Others lived in pit houses, which were partly dug into the ground and made of mud and grass.

1. What type of home was made from animal hides?

- a. longhouses
- b. pit houses
- c. tepees
- d. grass huts

2. How did American Indians build homes?

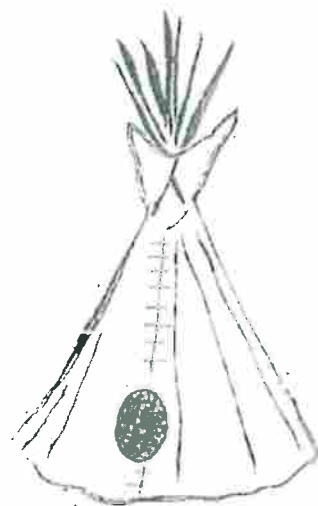

- a. All homes were made from resources in the area.
- b. All homes were made from branches and bark.
- c. All houses were made of the same material.
- d. All tribes lived in permanent homes.

3. Which culture built homes made from bricks?

- a. Northeast Woodland
- b. Great Basin
- c. Southwest
- d. Southeast

4. What house was best in cold weather?

- a. tepee
- b. open-air house
- c. longhouse
- d. grass hut

Why does the U.S. government have three branches? Each branch of government has special powers and jobs that the other branches do not have. And each branch *checks*, or stops, the other branches from having too much power. This system is called *checks and balances*. Here is an example of how checks and balances work: Congress creates bills, but bills do not become laws until the president signs them. Congress is the head of the legislative branch. The president is the head of the executive branch. The executive branch checks the power of the legislative branch. But the judicial branch checks both other branches. If a law is not fair, the judicial branch has the power to stop the law.

1. The government has a system of checks and balances so that

- (A) the president is the head of the executive branch.
- (B) Congress can create bills.
- (C) no branch has too much power.
- (D) there are three branches of government.

2. How does the executive branch check the power of the legislative branch?

- (A) Congress is the head of the legislative branch.
- (B) The president is the head of the executive branch.
- (C) Congress creates bills.
- (D) Bills do not become a law until the president signs them.

3. In this text, what is the definition of *checks*?

- (A) stops
- (B) marks
- (C) pieces of paper used to pay bills
- (D) examines

4. What is the tone of this text?

- (A) playful
- (B) guilty
- (C) somber
- (D) formal

5. *Bills do not become laws until the president signs them.* In this sentence, the word *them* refers to what?

- (A) until
- (B) the president
- (C) bills
- (D) signs

Directions: Read the text, and study the chart. Then, answer the questions.

If you inherit a trait, it was passed down to you from your parents. You can pass down an inherited trait to your children. Acquired traits are not passed down genetically. The only way you can acquire them is through learning or the effects of the environment.

Trait	Inherited or Acquired
eye color	inherited
calluses on fingers	acquired
large muscles from exercise	acquired
hair color	inherited
ability to ride a bike	acquired
dimples	inherited

- Which is an acquired trait?
 - dimples
 - hair color
 - ability to ride a bike
 - eye color
- Which is an inherited trait?
 - dimples
 - large muscles from exercise
 - ability to ride a bike
 - calluses on fingers
- If you break your leg, would that be passed down to your children?
 - Yes, it would be passed down genetically.
 - Yes, the child would learn this characteristic.
 - No, acquired traits are not passed down genetically.
 - No, both parents would have to break their legs for it to pass down.

Name: _____ Date: _____

Economics

There were three areas in the 13 colonies. Each was different because of its **geography**. The New England colonies had many trees, so the settlers built a lot of sawmills. Shipbuilders used the lumber. These colonies had a long coastline. They had many places to build ports.

The middle colonies also had ports along their coast. They grew lots of wheat and rye. These crops enabled colonists to make bread. They mined iron. They used hemp to make textiles. Paper was made in Philadelphia. Horses were bred in New Jersey.

In the southern colonies, plantations grew rice, tobacco, and indigo. Silk was produced in Georgia. Bricks, barrels, and pottery were made. Traders shipped goods to Britain at ocean ports.

1. Based on the text, what do you think the middle colonies were called?
 - a. the trade center
 - b. the breadbasket
 - c. the rice basket
 - d. the fishing center
2. In what colony were horses bred?
 - a. Massachusetts
 - b. Pennsylvania
 - c. Georgia
 - d. New Jersey
3. What colony was able to produce silk?
 - a. South Carolina
 - b. Virginia
 - c. Georgia
 - d. North Carolina
4. Why was the Atlantic coastline so important to the new colonies?
 - a. It was good land to grow crops.
 - b. It was good land for racing horses.
 - c. It had many beaches for swimming.
 - d. It had many ports for shipping to Britain.

Read the text and then answer the questions.

How does the judicial branch decide whether a law is fair? This branch uses the Constitution. The *Constitution* is the most important set of laws in the United States. The Constitution tells how the government will work. It also tells what each branch will do and the powers each branch has. It tells what the states are allowed to do and what the federal government is allowed to do. The Constitution has been *amended*, or changed, twenty-seven times. The first ten amendments are called the *Bill of Rights*. The Bill of Rights explains the rights that we have. For example, we have the right to give our opinion. The government cannot make a law stopping us from stating our opinions. If a law goes against the Constitution, it is unfair. If a law is not fair, the judicial branch stops that law.

Directions: Read the text, and answer the questions.

Almost no one can tell Stacey and her identical twin sister, Jen, apart. Their likeness is uncanny. They both have curly hair, brown eyes, and fair skin. There is one way people can tell them apart, though. Stacey knows how to play the flute, and Jen knows how to play the trumpet, but neither knows how to play the other instrument.

1. Why do identical twins look alike?
 - a. They inherited all the same traits.
 - b. They inherited different traits.
 - c. They inherited some of the same traits.
 - d. They have the same haircut.
2. How could you tell Stacey and Jen apart?
 - a. Ask them to stand side by side.
 - b. Ask to hear their voices.
 - c. Check to see who's taller.
 - d. Ask them to play the flute.
3. What could you ask about identical twins and other siblings?

4. Do you think it would be hard to tell identical twins apart? Why or why not?

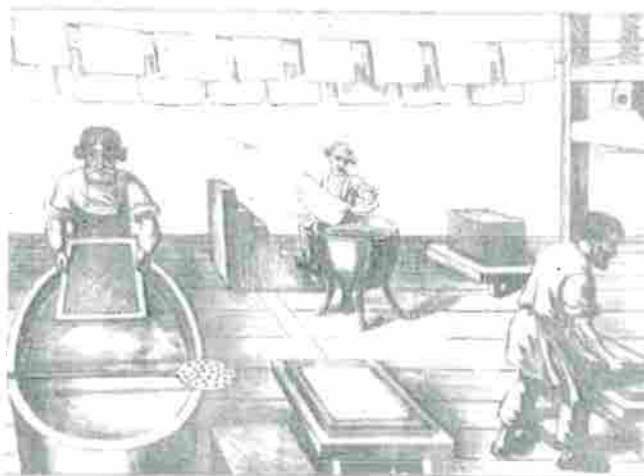

Name: _____ Date: _____

Directions: Read the text, and answer the questions.

William Rittenhouse settled near Philadelphia, Pennsylvania, in 1690. He built a paper mill and began to make paper. It didn't cost much to make paper in the colonies. Before then, all paper had been imported from Britain.

The paper was made from old rags and cotton. Power from a waterwheel beat the rags into a pulp. The pulp was spread on screens. The screens were hung to dry. This paper mill was the only one in the colonies for 20 years.

1. Before 1690, where did colonists get their paper?
 - a. New York
 - b. Britain
 - c. Philadelphia
 - d. Canada
2. What was used to make paper?
 - a. sawdust
 - b. tree pulp
 - c. rags and cotton
 - d. straw and hay
3. Based on the text, how would a paper mill help the colonies?
 - a. Printers could share their texts and ideas more easily.
 - b. Paper would cost less than bringing it from Britain.
 - c. The mill provided an early way to recycle.
 - d. The mill gave work to people at home in America.
4. Name three ways that paper would have been used in the colonies.

NAME: _____ DATE: _____

THE SUPREME COURT

The Supreme Court is the head of the judicial branch of the United States government. It is made up of a group of nine judges called *justices*. The head justice is called the *chief justice*. The president nominates, or names, justices. The Senate votes on the justices. Justices cannot be on the Supreme Court until the Senate votes for them. The Senate is part of the legislative branch of government. The president is the head of the executive branch. Those branches check the power of the judicial branch.

The Supreme Court Building

The Supreme Court also checks the power of the other two branches. Congress makes laws, and the president signs them. But if a law is unfair, the Supreme Court can stop the law. The justices look at the law carefully. They read the Constitution. They decide whether the law goes against it. If it does, then the justices can stop the law.

The Supreme Court also has other duties. If two states are having a disagreement, the Supreme Court decides the case. The Supreme Court is the top court in the country. So it also hears some cases from other courts. Sometimes, people do not think they got a fair trial. People who do not think they got a fair trial can *appeal*. That means they can ask another court to hear their case. Sometimes, people appeal to the Supreme Court. The justices hear some of those cases. There are a lot of cases, so the Supreme Court does not hear all of them. When the Supreme Court hears a case, it makes a decision. That decision is final and cannot be appealed.

The Supreme Court meets in a special building in Washington, DC. When people want their cases to be heard, all of the information on the case is sent to the justices. They decide whether to hear the case. If the justices decide to hear a case, the people involved in that case go to the Supreme Court Building. They state their points of view. Then the justices make a decision. Some decisions are *unanimous*. That means that all of the justices agree. Other decisions are not. When the justices do not agree, the Supreme Court rules the way that the majority of the justices vote.

NAME: _____ DATE: _____

DIRECTIONS

Read "The Supreme Court" and then answer the questions.

1. Who is the head of the Supreme Court?

- (A) the president
(B) the chief justice
(C) the Senate
(D) Congress

2. What do justices read in order to decide whether a law is fair?

- (A) newspapers
(B) the Internet
(C) textbooks
(D) the Constitution

3. What is the author's purpose?

- (A) to write about unfair laws
(B) to write about the Supreme Court
(C) to explain how to get to the Supreme Court Building
(D) to get people to visit Washington, DC

4. The Supreme Court probably has an odd number of members so that

- (A) votes will not end in a tie.
(B) the justices will hear cases.
(C) the Supreme Court will be larger.
(D) the president will nominate justices.

5. Which happens first?

- (A) Justices decide to hear a case.
(B) The people in a case go to DC.
(C) The justices get the case information.
(D) The justices make a decision.

6. What is a real-life example of something that is *unanimous*?

- (A) A soccer team wins a game.
(B) A kid eats all the cookies in a jar.
(C) A class votes on a celebration, and all the students want a movie day.
(D) The library has already checked out your favorite book.

7. Which is a summary of the text?

- (A) People can appeal to the Supreme Court if they did not get a fair trial.
(B) The president nominates justices.
(C) The Supreme Court is made up of nine justices.
(D) The Supreme Court checks the powers of the other branches and hears some cases.

8. How does the Supreme Court check the power of the other branches?

- (A) It nominates the president.
(B) It votes on justices.
(C) It decides whether a law is unfair.
(D) It meets in the White House.

Ships Built in the New England and Middle Colonies, 1674–1714

Massachusetts	1,246	Maryland	185
Pennsylvania	226	New Hampshire	769

- Based on the chart, where did the most shipbuilders live between 1674 and 1714?
 - New Hampshire
 - Massachusetts
 - Maryland
 - Pennsylvania
- Based on the image, describe the material and tools that are needed to build a ship.

- Why would these shipbuilders build a ship at this location?

NAME: _____ DATE: _____

THE SUPREME COURT

The Supreme Court is the head of the judicial branch of the United States government. It is made up of a group of nine judges called *justices*. The head justice is called the *chief justice*. The president nominates, or names, justices. The Senate votes on the justices. Justices cannot be on the Supreme Court until the Senate votes for them. The Senate is part of the legislative branch of government. The president is the head of the executive branch. Those branches check the power of the judicial branch.

The Supreme Court Building

The Supreme Court also checks the power of the other two branches. Congress makes laws, and the president signs them. But if a law is unfair, the Supreme Court can stop the law. The justices look at the law carefully. They read the Constitution. They decide whether the law goes against it. If it does, then the justices can stop the law.

The Supreme Court also has other duties. If two states are having a disagreement, the Supreme Court decides the case. The Supreme Court is the top court in the country. So it also hears some cases from other courts. Sometimes, people do not think they got a fair trial. People who do not think they got a fair trial can *appeal*. That means they can ask another court to hear their case. Sometimes, people appeal to the Supreme Court. The justices hear some of those cases. There are a lot of cases, so the Supreme Court does not hear all of them. When the Supreme Court hears a case, it makes a decision. That decision is final and cannot be appealed.

The Supreme Court meets in a special building in Washington, DC. When people want their cases to be heard, all of the information on the case is sent to the justices. They decide whether to hear the case. If the justices decide to hear a case, the people involved in that case go to the Supreme Court Building. They state their points of view. Then the justices make a decision. Some decisions are *unanimous*. That means that all of the justices agree. Other decisions are not. When the justices do not agree, the Supreme Court rules the way that the majority of the justices vote.

NAME: _____ DATE: _____

DIRECTIONS

Reread the text “The Supreme Court.” Then, read the prompt and respond on the lines below.

SCORE

___ / 4

Which part of a justice's job do you think you would like the most? Why? Which part would you not like? Why? Explain your answers.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Name _____

Practice Test

5.OA.B.3

Analyze patterns and relationships.

1. The table shows two sequences of numbers.

Day	1	2	3	4	5
Number of T-shirts sold	5	10	15	20	25
Amount earned (\$)	20	40	60	80	?

For numbers 1a–1b, choose the correct values to describe how one sequence is related to the other.

- 1a. The unknown number in Day 5 is

90
100
120

- 1b. The rule that describes how the number of T-shirts sold relates to the amount earned is

add 15
multiply by 5
multiply by 4

2. Jawan made a table to figure out how much he earns at his job.

Job Earnings						
Week	1	2	3	4	...	6
Hours Worked	6	12	18	24	...	36
Amount Earned (\$)	54	108	162	216	...	?

Part A

Write a rule that relates the amount Jawan earns to the number of hours worked. Explain how you can check your rule.

Part B

How much does he earn from his job by the end of Week 6?

\$ _____

Name _____

3. Look for a pattern.

Figure 1

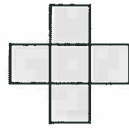

Figure 2

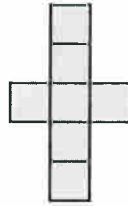

Figure 3

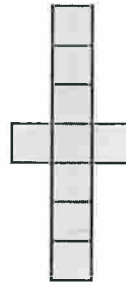

Figure 4

What is the rule? _____

How many squares will there be in Figure 5? _____ squares

4. Steven is buying a new mountain bike on layaway for \$272.

If he pays \$34 each week, how many weeks will it take Steven to pay for the bike? How can making a table help you solve the problem?

5. Look for a pattern.

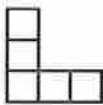

Figure 1

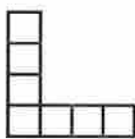

Figure 2

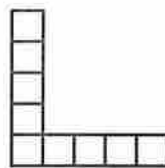

Figure 3

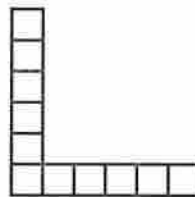

Figure 4

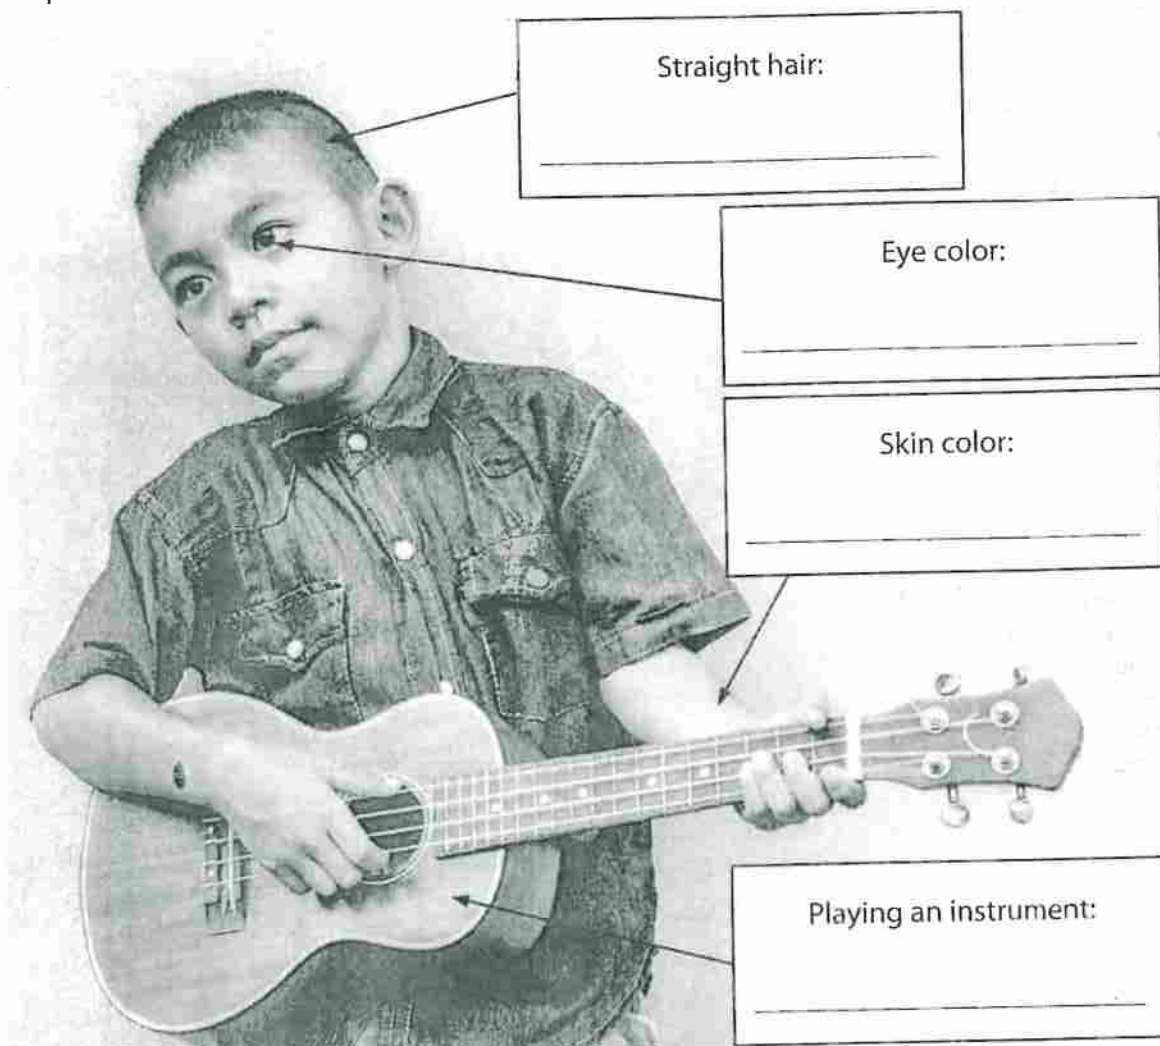

What is the rule? _____

How many squares will there be in Figure 5? _____ squares

Name: _____ Date: _____

Directions: Study the picture, and label the traits as "inherited" or "acquired." Then, answer the questions.

1. What are some acquired traits you have?

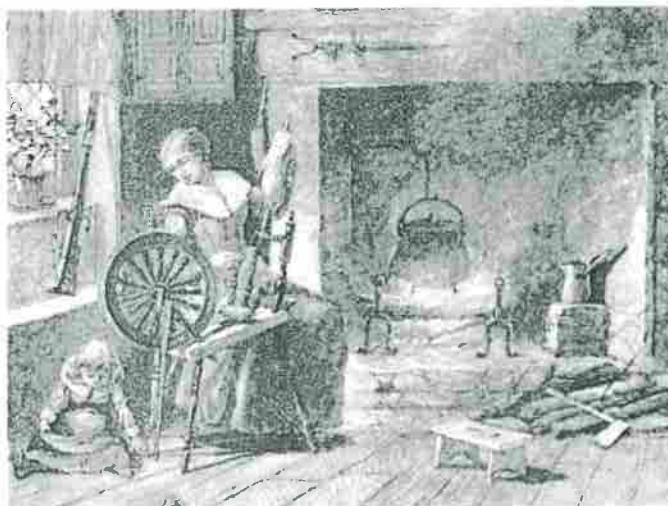

2. What are some inherited traits you have?

Name: _____ Date: _____

Directions: Study the picture, and answer the questions.

Women in colonial times lived different lives than they do today. They had jobs to do throughout the year. These jobs kept them working from dawn to dusk. Girls worked alongside their mothers at home.

Women also worked in their gardens. They would grow vegetables in the summer. The food would be harvested in the fall.

1. What were girls expected to do?
 - a. play outside all day
 - b. go to school to learn to read
 - c. find nuts and wild berries
 - d. help their mothers with work
2. Imagine that you live in colonial times. Describe a job you would like to do in and around the home.

3. Compare the life of a woman in a colonial home with the life of a woman today.

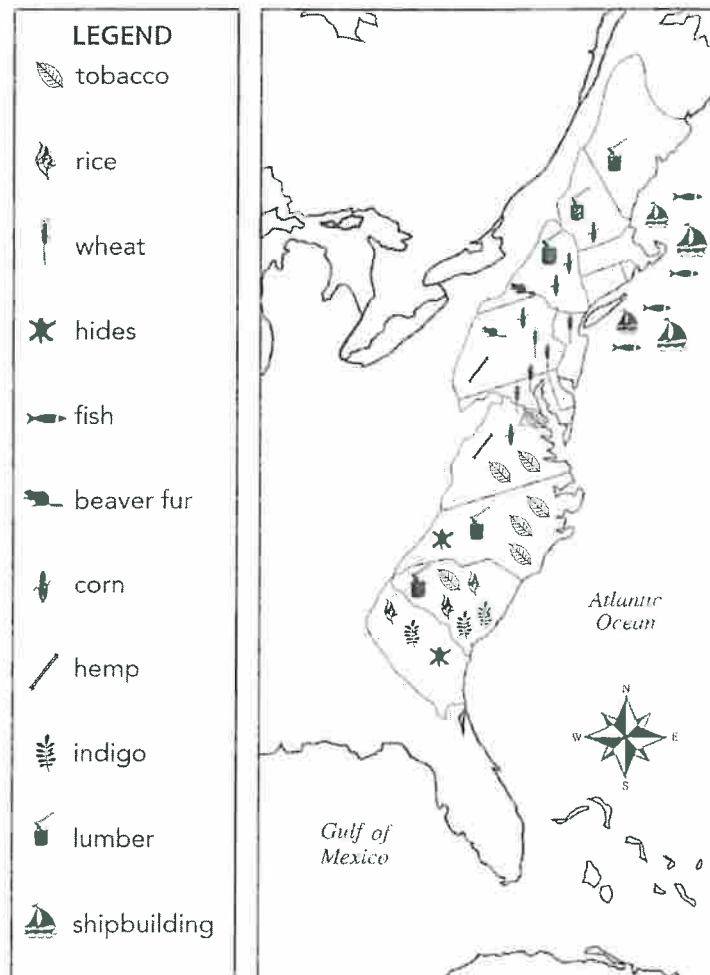

Name: _____ Date: _____

Directions: Review the map, and answer the question.

Natural Resources in the 13 Colonies

Economics

1. Explain how the industries are based on the geography in the colonies?
